Presentation and objectives

As part of the 6th National Conference of the Molecular Toxicology Laboratory, doctoral students, researchers and scientists from the field of molecular toxicology are expected to present the latest research findings and discuss emerging trends, as well as exchange ideas and perspectives on molecular toxicology mechanisms. Participants will also have the opportunity for:

- Collaboration and networking.
- Learning about new approaches to toxicological research.
- Exploring new areas of investigation. In general, such a meeting would advance the understanding of toxicology's molecular basis, with the ultimate goal of improving human and environmental health.
