Conference proceedings

### Aims and Objectives

### Conference Topics

### Important Dates

The aim of the ICWECC 2024 conference on water, environment, climate change, and sustainable development is to bring together experts, academics, researchers and stakeholders from around the world to discuss and exchange ideas on the pressing issues facing our planet. Through this conference, we aim to raise awareness about the importance of preserving our water resources, protecting the environment, mitigating the impacts of climate change, and promoting sustainable energy solutions.

This event will be an opportunity to exchange ideas and for discussions with distinguished scientists, experts and specialists coming from all over the world. Discussion on the latest innovations, trends and practical concerns and challenges faced in these fields are also encouraged.

The meeting provides an opportunity to raise awareness of global water issues, to share feedback and good practices for sustainable water management in different sectors of activity and to explore the training needs of artificial intelligence in the service of the environment.

1. Water treatment,
2. Waste Treatment,
3. Environnement and sustainable development,
4. Climate change : effect on water resources and the environment,
5. Analysis, quantification and monitoring of emerging pharmaceutical pollutants and micropollutants in water,
6. Artificial intelligence in the service for the environment.
