Topic 01

Natural Products in Disease Prevention and Management

Topic 02

Environmental Toxicology and Human Health

Sponsored by

Presentation and objectives

The 7th National Conference of the Laboratory of Molecular Toxicology which will be held at the University of Jijel aims to highlight the progress in research on natural products.

This conference aims to emphasize the importance of information and experience exchange between researchers from different Algerian universities to enrich the collective understanding of problems related to natural products, their pharmaco-toxicology as well as their impact on the environment. This conference will also help promoting collaborations and the exchange of ideas around new scientific advances and therapeutic innovations in this crucial topic.

The main objective of this conference is to create a meeting and a discussion space for doctoral students and researchers working on various themes related to the health benefits of natural products and the related environmental and toxicological considerations.

During this conference, participants will have the opportunity to present their research, findings and work in progress.
